EQB-1000D-1A

Stainless steel band

8.9 mm thin case

Bluetooth® Smartphone Link, a Tough Solar power system, and multi-hand chronograph timekeeping, all packed into an 8.9 mm thin case.

Last Lap Differential Indicator

When using the watch to measure lap time, the difference between the current lap and the last lap is indicated by a dial within a range of -5 to +1 seconds. This provides you with important feedback about constantly changing race conditions as they occur.

Dual Dial World Time

A dial on the face of the watch always shows the current time in another zone whenever you need it. A sub-dial also indicates a.m. or p.m. at a glance. You can use the smartphone app to select from among 300 cities.

- Smartphone Link (Auto time adjustment [4 times/day, auto summertime switching]), Approximately 300 World Time cities, 1/1000-second lap time records, Phone Finder, Operation tone on/off
- Current time in two different cities
- Day indicator
- Date display
- Stopwatch (200 lap time records)
- Time alarm
- Sapphire crystal with non-reflective coating
- Tough Solar (Solar powered)
- 100-meter water resistance
